

CONSCIOUS REAL INTELLIGENCE

CRI — Official Fact Sheet

by Ajinkya Virgaonkar, Founder and Creator | USPTO Trademark Serial #99668381 (Class 041)

What is Conscious Real Intelligence (CRI)?

Conscious Real Intelligence (CRI) is a non-commercial educational framework created by Ajinkya Virgaonkar, exploring the relationship between human consciousness, ancient Vedic consciousness science, and artificial intelligence. CRI's core proposition: current AI is *almost real* — powerful yet fundamentally incomplete — because the conscious human observer is absent from its architecture. Consciousness is already present in every human; it needs activation, not installation.

Current AI: Data → Compute → Output (Consciousness absent) **CRI model:** Evolved Observer ↔ Consciousness Layer
↔ AI = Real Intelligence

The Services

1. On-line non-downloadable articles in the field of human consciousness and artificial intelligence — a nine-article series on Medium (medium.com/@ajinkya.virgaonkar), in continuous publication since June 13, 2025 — covering the CRI framework, AWASTHA, the observer problem in AI, Vedic sound science, the Threshold State, mental health, and Intuition Score Capability (ISC).

2. Educational services — workshops and seminars in the field of human consciousness development and its application to working with artificial intelligence, supported by a free interactive practice application and published educational resources.

How the Services Are Rendered

All services are rendered online, free of cost. Articles are published on Medium. The interactive CRI practice application — with an AWASTHA state navigator, consciousness frequency generator (136.1 Hz, 432 Hz, 528 Hz, 7.83 Hz, 40 Hz, binaural states), guided Bija mantra sequence, interactive knowledge graph, and an AI-powered CRI guide — is delivered in the browser at ajinkyavirg.github.io/conscious-real-intelligence. Educational source materials, an installable Claude AI skill, and documentation are distributed through GitHub (github.com/ajinkyavirg).

The AWASTHA Framework (Original to CRI)

State	Sanskrit	Focus
A — Awareness	Chetana	Entry — clear, calm, intentional observer
W — Wakefulness	Jagriti	Active conscious presence
A — Attunement	Samanvaya	Vibrational alignment through sound (Bija, Raga)
S — Stillness	Sthirta	Deep perception; approach to Turiya
★ — Threshold	Svapna-Turiya	Lucid bridge state — Turiya touching Svapna
T — Transcendence	Atikramana	Direct consciousness recognition
H — Harmony	Samarasya	Consciousness integrated into daily life
A — Acceleration	Tvarita Pragati	The AI interface — observer co-creates with AI

Who It Is For & Channels of Trade

Prospective audience: members of the general adult public interested in consciousness studies, meditation and Vedic sound practice; technology professionals, AI researchers and developers interested in the role of the human observer in AI outcomes; and students of philosophy and consciousness science. **Channels:** free online distribution via Medium, GitHub Pages, and GitHub repositories. No paid products, no advertising, no monetisation — CRI is a non-commercial educational body of work.
